WRITABLE

WRITABLE

PROJECTION

WRITE, PROJECT,
MAGNETIZE,
OR DO IT ALL

Walltalkers speaks to both design and functional needs so that creating a surface-scape is a creative, inspiring experience.

***Projected** images are seen in flawless resolution on high-performance surfaces. Brainstorming, formulating, solving and pitching is scribbled out on **writable**, erasable, semi-gloss surfaces. And charts, images, and anything else a magnet can handle clings to our highly attractive **magnetic** receptive surfaces. From wall-to-wall and floor-to-ceiling, Walltalkers delivers exactly what you're looking for.*

FLEXIBLE INSTALLATION

*Wall-to-wall. Floor-to-ceiling. Framed or unframed. Overlapping functions. **Walltalkers enhance any interior environment, with the choice of design expression entirely yours. You can have just about anything, just about anywhere.***

If you aren't sure of all the ways you can install Walltalkers, collaborate with your salesperson to find the perfect solution. Because there always is one.

Share ideas. Solve problems. Teach, and learn – all on our writable, re-writable surfaces. High-quality, high-performance Walltalkers top film provides uniform coverage with a clean, bright surface for excellent readability and eraseability. And while all Walltalkers are writable, these are our core styles suitable for writing. That means an inexpensive, wall-to-wall, floor-to-ceiling solution that takes communication and collaboration to new levels of clarity and success.

GRID

EZ-Rite®, Just-Rite® 60, and Koro-Rite® products meet the California Indoor Air Quality Specification (CA-IAQ 01350).

A Walltalkers collaboration space can do “double duty”, and take a project from formulation to presentation, too. Our **writable projectable** surfaces offer clean, virtually seamless solutions for birthing ideas and hashing out details in a meeting, a classroom, a studio or anywhere creativity happens. And for projecting ideas or showcasing a finished concept, our writable projectable products deliver high-definition, non-glare surfaces for wide-angle “wow.” All of it wall-to-wall, ceiling-to-floor – even around curves and all on one surface.

PROJECTABLE
WRITABLE
MAGNETIC

Our highest definition projectable surface provides superior clarity at even wide-angle viewing, with virtually no image fall-off.

(patented bi-directional lenticular embossed vinyl - patent # 5,361,164)

A selection of widths are available

Nu-Vu-Rite™, Project-Rite™, and Matte-Rite™ products meet the California Indoor Air Quality Specification (CA-IAQ 01350).

If a picture is a worth a thousand words, then our **magnetic** receptive surfaces add volumes to what you want to say. Put anything a magnet can hold right on a Walltalkers wall to enhance a presentation, tell a better story or let brainstorming run wild. And after scribbling away on our bright, writable surfaces – erasing and re-writing along the way – make your presentation even more “magnetic” with images, maps, pictures and color swatches.

GRID

**PROJECTABLE, WRITABLE
MAGNETIC**

Write a few ideas down on one of our walls. Write a few more. Project a video to get the team going. Put up some images and inspirational tear sheets as the ideas get fleshed out. When collaboration calls for **writable**, **projectable** and **magnetic** receptive surfaces in the same space, Walltalkers comes through with all three. All you have to do is choose the way that works best for your surface-scape for one beautiful interior solution.

The Walltalkers Starter Kit includes:

- eight markers
- 8 oz. spray bottle of liquid cleaner
- one empty 8 oz. spray bottle for water
- one dry-erase microfiber cleaning cloth
- two microfiber erasers
- one care and maintenance decal
- installation instructions

Order individual erasers, cloths, cleaners, markers, and magnets to meet specific needs.

by Koroseal

Walls, doors, partitions, panels and room dividers can be much more than one might expect. Tac-Wall turns them into decorative and functional spaces quickly and economically. It's a colorful linoleum/cork wallcovering that's self-healing and exceptionally resilient, resistant to cracking, drying or peeling. It's biodegradable and hygienic, too. And because Tac-Wall is washable, it looks new even after years of use. Have a surface you need to get more use out of? **Tac-Wall makes it**

TAC-WALL®

Display schedules, artwork, posters, charts, memos, and more

Trim your presentation surfaces with a continuous 1" or 2" multipurpose clear satin anodized aluminum rail with a tackable Tac-Wall® insert. Tack rails are a perfect addition to surface-scaping with Walltalkers and are available in all Tac-Wall colors. Easy to install and compatible with other Walltalkers accessories, they can be customized to the individual length of your application.

For use with 1" Tack Rail Only

- Flag Holder
- Hooks
- Map Hanger

Paper rails securely display loose documents with a system of interlocking rollers that instantly grip and hold inserted materials up to 1/8" thick. They're constructed of a continuous satin anodized aluminum and are available in lengths up to 12 feet. Use paper rails as an accessory for your Walltalkers® or Tac-Wall® surface, or as a stand-alone piece.

J-Trim, H-Trim, Inside and Outside trims are available for Tac-Wall.

KEY FEATURES

High Quality

Walltalkers products are made with the highest-quality materials and use a meticulous lamination process to ensure 100% uniform coverage of the vinyl substrate.

The key to this process is laminating with our high-performance dry-erase film, which creates a surface that is exceptionally resistant to stains, impervious to solvents, and measurably more durable than inexpensive coatings and paints. That means no thin spots or “pin-holes” on the surface to let ink, stains and solvents penetrate and discolor.

Superior Durability

Our insistence on quality materials and processes results in a product that looks better and lasts longer for you. Walltalkers uses only the highest-quality materials to ensure our surfaces maintain their flexibility and performance without cracking, chipping, peeling or deteriorating, even under daily use.

Easy Maintenance

All it takes is simple care to preserve and protect the beauty and performance of a Walltalkers surface. Typical dirt and stains can be removed by simply wiping with a damp cloth or sponge and a mild soap or cleaner. Tougher stains can be tackled with more powerful cleaners. Unlike other wallcoverings, Walltalkers products are impervious to most chemical solvents that can break down, discolor, and even deteriorate surfaces.

Walltalkers recommends specific markers for optimum performance, and marking can be left on the surface for as long as needed. Removal is always easy and complete because our products are exceptionally stain-resistant. They won't discolor even if they come in contact with things like permanent markers, crayons, coffee, lipstick, ketchup – even wine.

Simple Installation

Walltalkers collaboration surfaces come in flexible rolls and install like most commercial wallcoverings. Simple instructions guide installers through the process of applying Walltalkers products to a clean, smooth, sealed surface.

Horizontal seams are recommended when installing Walltalkers. For virtually invisible seams and 100% useable presentation surfaces floor-to-ceiling and wall-to-wall, we recommend double-cutting all seams and railroading the vinyl (see diagram) to ensure color matching.

PRIOR TO USING all Walltalkers products should be washed with an ammonia or alcohol-based cleaner or mild soap and rinsed thoroughly with water.

5-YEAR Warranty

Walltalkers wallcoverings are warranted for **5 YEARS** not to crack, chip, check, or peel; to resist staining and yellowing; and to show no appreciable fade when properly cleaned and maintained and used with the appropriate dry erase markers.

Low Emissions

Most Walltalkers products meet the **California Indoor Air Quality Specification 01350**.
